I am a technician that is fully capable of diagnosing and repairing today's cars with today's technologies. I stand out from many technicians with my drive to produce and my neat and clean work area. Come in early and stay late attitude. Personal phone use at a minimum. I am always trying to improve my skill set and take my job seriously. Level 2 Chrysler training. BMW equivalence certified. GM experience. I have experience in the private repair sector diagnosing and repairing all makes and models. I specialize in diagnostics and electrical problems as well as deciphering customer complaints. Capable of navigating dealer service information and reading wiring diagrams. Experience working on cars from all generations makes and models including Porsche, Audi, BMW. Knowledge in programming and updating computer software with dealer diagnostic equipment. I can help a shop run smoother due to my ability to properly diagnose cars the first time. I am very thorough when checking over a car. I take pride in my work. Wanting to be challenged with difficult repairs and diagnostics. I understand the correct mindset for proper diagnosis. I would like to work for a shop that takes pride in what they do so that the customer receives excellent service.

Authorized to work in the US for any employer

## Work Experience

---

### **Lead Diagnostic Technician**

Hughes Motors, Inc.-Yonkers, NY

November 2021 to December 2022

Lead diagnostics technician. Helped keep a fast paced shop running smoothly by efficiently diagnosing CEL's and electrical problems as well as any other customer concerns.

### **Automotive technician**

Briarcliff auto service-Briarcliff Manor, NY

March 2020 to November 2021

Diagnosing and repairing vehicles such as Porsche, Audi, Mercedes Benz, Bmw as well as Japanese and American makes and models. My job Duties include diagnosing check engine lights, using oscilloscope to aid in diagnosis, solving evaporative emissions problems, solving electrical problems, inspecting vehicles, performing multi-point inspections, rebuilding complete engines including replacing pistons and connecting rod bearings, full mechanical restorations of cars, replacing clutches and transmissions, performing alignments.

### **Technician**

Bedford Jeep-Bedford Hills, NY

September 2019 to March 2020

Worked on two lifts. Handling diagnostics and performing the work in the shop that requires the highest skill level. Fix vehicle right the first time. Certified level 2 (out of 3) CDJR classroom training.

## **Automotive Technician**

Bmw of Mt kisco-Mount Kisco, NY  
July 2018 to August 2019

Performing automotive services and diagnostics at the highest skill level. I was one of the two technicians (out of a shop of 16 technicians) given a second lift to work out of. I was given the lift due to my work effort.

## **Cdjr technician**

Bill volz-Cortlandt Manor, NY  
March 2017 to July 2018

Here I was introduced to dealership work and began my on the job, web based, and instructor based manufacturer training.

## **Auto Technician**

Stofa's auto service-Poughkeepsie, NY  
May 2015 to October 2016

Auto technician checking over vehicles for needed repairs and performing them
